

4. Abiotic Factors of Soil, Water & Air

Time require: Part A-60 minutes; Part B-

Problem:

- What is the different of light intensity, temperature and evaporation of air in shaded and unshaded area?
- What is the different of pH, moisture and water holding capacity of soil in both area?

Materials

(per Students Group Work)

Procedure

Part A. Measurement of light intensity, temperature & evaporation of air

Part B. Measurement of pH, moisture and Water Holding capacity
