Abstract

In order to improve the quality of education and on the make success of 12 year of basic education in Indonesia, the government keep maintain efforts to increase school achievement so that can meet a demand with National Education Standard in particular on 1st-3rd grade in secondary level (SMP and SMA) which standard items are : content, process, competence of graduate, educator man power, facilities and infrastructures, management, defrayal, and education assessment shall incline with a good program-line and periodic.

The Implementation on Pioneering Work of School of International Standard (Sekolah Berstandar Internasional/SBI) is one of means to assist national education quality so as to compete with global citizen which is applied on kabupaten (cities) through cooperation between local governments.

Since the government announces officially pioneering work on SBI last year, a detailed examination has been done to the school with pioneering work of SBI in Four-Kabupaten which are involve 600 students and 60 teachers for 4 years which emphasize on mathematics, science and information technology subjects. Those research all it once as independent assistantship program in order to develop National Education Standard to the following standard items : component and learning process standard (content, process and education assessment), organization and school management, facilities and infrastructures, educators man power (educator and administrator), defrayal, student, society share participation, environment / school cultures, production unit and partnership institution.

These paper discuss about a framework of assistantship of pioneering work of SBI since the first time 2006/2007 until further steps on 4 years at the end of program along with school adaptable efforts which is collective planned to succeed the government program. What the end result from the assistantship program is hand over an input and inspire others school a development model of SBI on SMP in Indonesia
